

# YUSUF ÖZPAMUK

COMPUTER ENGINEER STUDENT

## PROFESSIONAL SUMMARY:

**Final-year Computer Engineering student with strong skills in mobile app development using Android (Java/Kotlin) and growing experience in web technologies like React. Passionate about various areas of software development and always eager to learn. Currently seeking an internship opportunity to further**

**developmy skills and contribute to real-world projects.**

## CONTACT

Phone: **+90 (531) 500 96 94**

LinkedIn: **[tr.linkedin.com/in/yusuf-ozpamuk](https://tr.linkedin.com/in/yusuf-ozpamuk)**

Email: **yusuf123.ozpamuk@outlook.com**

Github: **[github.com/josephkey9](https://github.com/josephkey9)**

Address: **Beyoğlu,İstanbul**

## INTERN EXPERIENCE:

**UPS and Data Backup 07/2025-08/2025 (1-month mandatory internship)**

### REMİVAC

- **Started in the testing and repair department of Uninterruptible Power Supply (UPS) systems, where I learned to work on motherboard repairs using scrap circuit boards.**
- **Gained hands-on experience with soldering and fault detection on electronic components, especially focused on UPS mainboards.**

**Transitioned into the data storage support team, assisting with analyzing system logs and identifyingissues experiencedby clientcompanies.**

**Smart Home Systems 07/2025-08/2025 (1-month mandatory internship)**

### DEFCAR

## EDUCATION:

**İstanbul Sağlık ve Teknoloji Üniversitesi | 2022 - 07/2026**

Computer Engineering

- **GPA:2.5**

## PROJECTS:

**DestekEli - (Adroid/Java/Kotlin/Firebase) :**

- **Android health-support app developed using Java, XML, and Firebase.**
- **Features include user authentication, real-time database integration, and WhatsApp-style chat functionality between doctors and users.**
- **Enabled secure, live messaging using Firebase Realtime Database and FirebaseAuth. Strengthenedmobile UI/UX design,data validation, and asynchronous data handling.**

**FootballPlayerScoutApp (React, JavaScript):**

- **Built with React, utilizing a predefined player dataset in Data.jsx; demonstrates state management, conditional rendering, and data filtering for a player scouting simulation.**
- **Strengthened front-end skills and API/data handling logic.**

**Multi-Stop Route Optimization Tool (Python):**

- **Created during my time at Remivac to assist service teams in calculating optimal routes: begins with one mandatory address and dynamically selects additional stops.**
- **Implements shortest-path algorithms and route planning logic to improve on-site efficiency.**

## Technical Skills:

• **Java**

• **Python**

• **Android Development**

• **React,JavaScript, HTML, CSS**

• **SQL (MySQL,Sqlite)**
