## **INTERN EXPERIENCE :**

### **UPS and Data Backup 07/2025-08/2025 (1-month mandatory internship)**

- Gained hands-on experience with soldering and fault detection on electronic components, especially focused on UPS mainboards.
  - Transitioned into the data storage support team, assisting with analyzing system logs and identifying issues experienced by client companies.
- 

## **EDUCATION :**

**Computer Engineering**

**Sep 2022 - Aug 2026**

**Istanbul Sağlık ve Teknoloji University**

- GPA : 2.5
- 

## **PROJECTS :**

### **My Film Dairy (MERN Stack Project):**

- Includes an interactive Film Wizard that recommends movies based on user-selected preferences
- Built a modern, responsive frontend using React, Chakra UI, and Zustand, enabling users to add, rate, and manage films efficiently.
- Developed a secure and scalable backend with Node.js, Express, and MongoDB to handle all film data and user interactions.
- Integrated TMDB API to automatically fetch film posters and enhanced UX with full CRUD operations, modal-based editing, sorting, and light/dark mode support.

### **LostLink (Thesis Project):**

- Designed a full-stack system for port environments with automated item/child matching and AirTag-based ChildTag tracking.
- Built a secure backend (Node.js, Express, MongoDB) with JWT auth, RBAC, rate limiting, Cloudinary uploads, and complete CRUD APIs.
- Developed a React + TypeScript frontend featuring item reporting, child alerts, and an admin dashboard with real-time management tools
- Implemented Dockerized architecture, Swagger API docs, and production-ready configurations for deployment.
